

## REPRODUCTION WEAPONS

All handmade by the same blacksmith/bladesmith

1. A 7ft Bannermans Naginata. Weight 5.5lbs approx with a 22inch blade, full decorated wooden scabbard for the blade.
2. The copy of Richard the Lionhearts crusader sword made for the BBC series "The Crusades", with letter of provenance form the maker. 44Ins long, 35.5inch blade, engraved 'homo dei' and 'in nomine domine' in gold, engraved/etched pommel, 5lbs weight.
3. An archers dagger/dirk, fully engraved/etched 6.75ins blade with archery/hunting scenes. Weight 0.49lbs, length 11.75ins, plain leather sheath.
4. English archers ballock dagger with by knife and pricker based on examples in the Wallace collection. Overall length 21ins, blade 15.5ins. Hilts of fiddle back maple with brass pommels. Weight 1.44lbs. Sheath plain brown leather.
5. Scot dirk carried by me for several years as part of my kit. Weight 0.94lbs, blade 14.75ins, overall length 22.5ins. Carved knot pattern hilt shoes some wear, black leather sheath. Brass furniture on sheath and knife.
6. 18thC 'walking sword'. A hybrid style used by merchants bodyguards in Hong Kong, Singapore and Macao. A light, straight blade similar to Chinese Jain tapered blades with Japanese style hilt. Hilt whipped with bronze wire in European style. Blade length 29.75, overall length 36.5ins, weight 1.45lb. Black leather and brass scabbard.

7. Two matching 16thC-17thC foils. Bound leather hilts with turkshead knot grip. Steel cross guards and pommels. Weight 1.33lbs. Detachable rubber tips included. Overall length 42.75ins, blade length 36.5ins.
8. Romano/Celtic matching sword and dagger. Damascus forged iron blades incorporating siderite. Blade pattern is stream and pool sometimes called lighting and water. Etched bronze fittings on both hilts and scabbards. Sword weight is 2.35lbs, length 26ins, blade 21ins. Dagger weight 1.15lbs, 15.75ins overall, blade 10.75ins. Hilts believed to be bone or horn.
9. Matched sword and dagger. Hybrid pattern based on Celtic longsword. All the fittings are sterling silver inlaid with Whitby jet and red gold detailing on the scabbard. Both blades are Damascus steel. Hilts of buffalo horn inlaid with silver flowers.
10. A 17thC gunners stiletto marked out for powder measures for cannon. Silver fittings on sheath, cross guard and pommel. Weight 0.43lbs, overall length 17.5ins, blade 12.75ins.

All the weights are as close an approximation as I can manage.

Pictures are available on request.
